## **DETAILED ACTION**

### ***Status of Application***

The decision given by the board is acknowledged, however, a review of the claims and an update search prior to allowance revealed dependent claims 6 and 8 as well as dependent claims 7 and 9 have the same language and two patents were discovered that should be considered by applicant before allowance of the application. A rejection based on the use of the same language in the dependent claims and a rejection based on the patents is given below.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6-7 and 8-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 6 and claim 8 depend from claim 1 and also recites the same claim language. Claim 7 and claim 9 also fail to distinguish from one another.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2134

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 3, 5, 6, 8, 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. patent 5,365,586 granted to Indeck et al.

The Indeck reference discloses a method and apparatus for fingerprinting magnetic media. This fingerprint may be affixed to an object of manufacture in order to verify and authenticate the object, see Abstract.

With respect to claim 1, step a, the label with unreproducible pattern is disclosed as column 6, lines 23-28;

step b, describing the unreproducible pattern and including the description with the information relating to the article at column 4, lines 30-35 and Figure 3;

step c, encrypting a portion of the information at column 2, lines 35-45; and

step d, securely associating the article, the label and a tangible representation of the encrypted information at column 3, lines 5-10.

With respect to claim 10, see Figure 3, and column 6, lines 23-28.

With respect to claim 11, see column 4, lines 35-38 which disclose the verifying step.

Claim 2, see column 4, lines 8-18.

Claim 3, see column 4, lines 24-40.

Claim 5, see column 3, lines 54-62.

Claims 5 and 8 are met by the description at column 4, lines 35-38.

Art Unit: 2134

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. patent 5,365,586 granted to Indeck et al and further in view of U.S. patent 5,638,446 granted to Rubin.

The Indeck patent discloses verification using the publicly known key at column 4, lines 35-38. However, the instant claims provide for signing of the public key by a trusted third party. The patent to Rubin teaches a secure distribution of electronic files. The files are signed by the source of the files (the authors) and the public key of the authors is signed with the secret key of a trusted third party, see Figure 2, blocks 30, 32, and 34. It would have been obvious to one of the ordinary skill in the art at the time of the invention was made to sign the public key of the source as taught in Rubin in order to provide a public key of a source with the certification of a trusted third party.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew B Smithers whose telephone number is (703) 308-9293. The examiner can normally be reached on Monday-Friday (9:00-5:30) EST.

Art Unit: 2134

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gilberto Barron can be reached on (703) 305-1830. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 746-7239 for regular communications and (703) 746-7238 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-3900.
